ISANI Moor's Benefits...

✓ **Detoxifying**

The high proportion of humic acid and other humus substances enable the Moor to both draw and absorb toxic substances trapped in the tissues. Detoxification is widely recognized as an important component of health care maintenance and anti-aging.

✓ **Bio-Available**

Moor is easily absorbed by the body. The substances present are in colloidal and bivalent form, thus they are small enough to be easily absorbed by the system.

✓ **Antiseptic**

Moor contains lignin and bitumen, both of which contain high proportions of phenol substances and these substances act as natural antiseptic.

✓ **Anti-Inflammatory**

Moor has consistently been found to exert an anti-inflammatory effect on irritated or inflamed tissues

✓ **Ion-Exchanging**

The presence of humic acids also causes an exchange reaction in which harmful positive ions in the tissues are replaced by revitalizing negative ions present within the moor.
